Inspection Results

The City of Davenport conducts inspections of all required water detention basins and ponds at least once every five years to ensure that they are being properly maintained and function as originally designed. The results of this year's inspection are as follows.

Visual inspection found no apparent problems with the structure.
Repairs and/or maintenance is required. Please submit a plan of action within 30 days of this request.

Additional Comments and Maintenance Concerns

(This area is currently blank for additional comments and maintenance concerns.)

Responsible Agency/Individual(s) Maintenance Requirements

Proper operation and maintenance are the sole responsibility of the developer or property owner(s) identified in the location's Maintenance and Repair Agreement (M&RA), recorded with the Scott County Auditor. M&RA becomes the responsibility of subsequent property owners. In the absence of an M&RA, proper operation and maintenance become the responsibility of the property owner(s) or HOA served by the system.

Maintenance of stormwater detention structure(s) is vital to ensure the effectiveness of the detention pond. If maintenance is not completed in a timely manner, please be advised the City of Davenport reserves the right to complete the maintenance and assess the responsible agency/individual(s) for any costs or damages incurred. Notice will be given if the City chooses to pursue this action.

Based on the results of this inspection	No further action needed	Responsible parties shall contact this office to inform the date repairs are completed and schedule re-inspection.
